Do your students with disabilities need practical life skills that are hard to achieve in the classroom setting? The Rocket Refuel Coffee Cart is a student led “business” started from scratch. Students start their morning by taking orders, fulfilling orders, and delivering. Social language, teamwork, and job skills are just a few of the 21st century skills that the coffee cart targets. Students must fill out an application and go through an interview process to be a part of the coffee cart. This presentation will give you everything you need to start your own coffee cart business!

LEARNER OUTCOMES:

At the end of the session, participants will be able to:

1. Identify the 21st century skills a student led coffee cart provides.
2. Understand the need for more natural life skills opportunities.
3. Immediately implement a coffee cart in their own school district or facility.
4. Access and utilize applications, interview questions, and forms already created.
5. Create student excitement and buzz about starting their own coffee cart.
