Make a copy of this slide deck and move it to your drive for your use.

Please do *not* make changes to the master slide deck.

Our Recommendations:

- Make a copy of this presentation and move it to your own drive
- For the best experience consider breaking the information into multiple presentations/discussions over the course of a school year.

SUGGESTIONS

- Add, delete, or edit slides (but not on the master copy)
- Personalize the 'District and Building' slides beginning on Slide 60
- Contact any of the authors with questions or suggestions.

How to Navigate:

- Slide 9 lists the Topics/sections on the presentation.
 Clicking on a bubble will take you to that specific s₂
- Clicking on the school house on the lower right side slide will bring you back to Slide 9, listing all Topics/sections bubbles
- Arrows on the bottom, center of a slide are color-coded and will take you back to the beginning of the section

Operating Standards

Effective July 1, 2014

Importance of Operating Standards

Operating Standards:
 Where to Look

Importance of Operating Standards

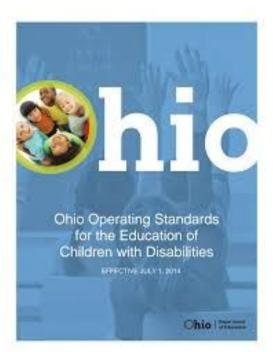

The Ohio Operating Standards for the Education of Children with Disabilities identifies the state requirements and federal Part B Individuals with Disabilities Education Improvement ACT (IDEA) requirements that apply to the implementation of special education and related services to students with disabilities by school districts, county boards of developmental disabilities and other educational agencies

It requires traditional public schools and chartered community schools to adopt written procedures regarding the education of children with disabilities. The district may adopt the Special Education Model Policies and Procedures developed by the Ohio Department of Education or develop their own and submit for approval.

- License Maintenance
- ProfessionalOrganizations
- Cultural Competence

Ethics

- ASHA Code of Ethics 2016
- Ethics Q & A for School-Based SLPS
- Licensure Code of Professional Conduct for Ohio Educators
- Continuing Education in ETHICS is required by both:
 - o The Ohio Speech & Hearing Professionals Board (OSHPB) and
 - The American Speech and Hearing Association (ASHA)

OSHPB	TWO hours of Ethics	Every two year cycle
ASHA	ONE hour of Ethics	Every three year cycle

Confidentiality

Each district is responsible for providing yearly training in confidentiality. Individual districts can choose how they provide the training. Many districts now use Public School Works online training system.

<u>Licensure Code of Professional</u> <u>Conduct for Ohio Educators</u> ODE: Licensure Code of Professional Conduct,
Updated February 2020

<u>Issues in Ethics:</u> <u>Confidentiality</u> Loose Lips: Confidentiality in Relationships with Colleagues

FERPA

<u>FERPA</u>: The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a Federal law that **protects the privacy of student education records**. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Students to whom the rights have transferred are "eligible students."

Licensure Required to Work in Ohio's Schools:

- A valid two year license from the Ohio Speech & Hearing Professionals Board Or
- A valid conditional license from the Ohio Speech & Hearing Professionals Board And
- A valid five year Pupil Services License from the Ohio Department of Education Or
- Registration with the Ohio Department of Education (as of April 7, 2021)
 *ASHA CCC's are preferred but not required.

Clinical Fellowship & Supervised Professional Experience

Most new grads complete both their Clinical Fellowship (CF) and Supervised Professional Experience (SPE) concurrently however the requirements do differ so be sure to know what is required including paperwork and timelines.

Note: It is the SLP's responsibility to check that the supervisor has current credentials.

Also, it is the SLP's responsibility to upload/turn in final paperwork to both ASHA and the OSHPB within the required timeframe.

Clinical Fellowship (CF)

ASHA Clinical Fellowship

The SLP CF is a mentored professional; experience that begins after the completion of academic coursework and clinical practices. The purpose of the CF is to integrate and apply the knowledge from academic education and clinical training, evaluate strengths and identify limitations, develop and refine clinical skills consistent with the Scope of Practice in Speech-Language-Pathology, and advance the Clinical Fellow from 'needing constant supervision to being an independent practitioner'.

Clinical Fellowship (CF)

The ASHA CF experience is a minimum of 1,260 hours and a minimum of 36 weeks of full-time experience.

As a Clinical Fellow, you are required to complete your CF experience within 4 years or less from the date your CF began.

Completion of the Clinical Fellowship

A complete CF experience must have

1. A minimum of **1,260 hours of clinical experience working under the mentorship of a CCC-SLP** who meets the mentor requirements as outlined in 2020 Standard VII;

Clinical Fellowship (CF)

- 2. A minimum of 36 weeks of clinical experience (30 hours per week) working under the mentorship of a CCC-SLP;
- 3. A minimum of 6 hours of direct supervision and 6 hours of indirect supervision completed during each segment by each mentor;
- 4. A minimum rating of 2 under the 2020 CF experience in the final segment of the CF; and
- 5. All hours/segments recommended by each CF mentor in order to count toward the CF experience.

Supervised Professional Experience (SPE)

Ohio Speech and Hearing Professionals Board Ohio Speech and Hearing Professionals Board

OSHPB Supervised Professional Experience

Supervised Professional Experience: Purpose of the professional experience is to provide the opportunity for successful transition in status from student to independent professional. Chapter 4753-3-07 of the Ohio Administrative Code pertains to the professional experience requirements and can be accessed here: Supervised Professional Experience Guidelines:

The professional experience requires 18 on-site conferences and 9 monthly evaluations between the supervisor and the conditional licensee working under an approved supervised professional experience plan. The plan for the Supervised Professional Experience must be filed within 30 days of starting your employment

Ohio Speech & Hearing Professionals Board Licensure Maintenance Process

Continuing Education is required by the <u>OSHPB</u> and outlined in the <u>Ohio</u> <u>Administrative Code</u> in order to renew a license every two years.

Renewals must include:

- Twenty continuing education hours including
 - o Two hours of Ethics training
 - o Ten of the hours must be in your area of licensure

Ohio Department of Education: Pupil Services Licensure (PSL) Maintenance Process

The renewal process every five years includes:

- Online renewal
- Valid OSHPB license (meeting CE requirements)
- Current BCI & FBI background check
- \$200 fee

Note: If you let your PSL expire, you will have to meet all of the initial requirements over again in order to reinstate your PSL.

Ohio Department of Education: Related Services Registration Maintenance Process (as of 4–2021)

The renewal process every five years includes:

- Online renewal
- Valid OSHPB license (meeting OSHPB CE requirements)
- BCI & FBI background checks
- \$150 fee

ASHA CCC Maintenance

ASHA requires continuing education every three years in order to renew the Certificate of Clinical Competence (CCC). Renewals must include:

- Thirty hours of continuing education including
 - One hour of Ethics training
 - Two hours in Cultural Diversity

Note: Subscribing to ASHA's CE Registry is optional

Tip: ONE hour of continuing education = 0.1 CEU

Licensure and Continuing Education Requirements for School-based Speech-Language Pathologists and Educational Audiologists

AGENCY	RENEWAL PROCESS	RENEWAL CYCLE	CONTACT HOURS REQUIRED	PROOF REQUIRED	FEE	MANDATORY OR OPTIONAL
OHIO SPEECH AND HEARING PROFESSIONALS BOARD (OSHPB)	Renew OSHPB license online through e-license every two years no later than December 31st of even year. CE Broker tracks continuing education. Audits randomly selected amongst those who do not use CEBroker.	2 year cycle. Must renew no later than December 31 st of each even year. Audits randomly selected amongst those who do not use CEBroker.	20 contact hours including 2 hours in Ethics. Ten hours must be in your licensure area	Proof of contact hours: such as Certificates of Attendance, transcripts, etc. if audited.	\$120 fee. Dual:\$170 A \$150 fine will be incurred if renewal is late. Total with late fee= \$270.	MANDATORY to practice in any setting in the state of Ohio.
OHIO DEPARTMENT OF EDUCATION (ODE)*	Renew 5 year Pupil Services License online at ODE. Search 'teacher licensure' for a link to the online renewal system. Or Renew your Registration online at ODE if you do not hold a Pupil Services License	5 year cycle. Registration period runs from July 1º to June 30th every five years. FBI Background check is necessary. Those with Registration only must comply with criminal background checks, etc. and re-register every 5 years.	ODE defers to the OSHPB's continuing education requirements*	Submit renewal application, fee & check the box indicating you hold a CURRENT license by the Ohio Speech & Hearing Professionals Board. OR Renew your Registration.	\$200 every 5 years to renew your Pupil Services License OR \$150 every five years if renewing a Registration.	Either maintaining a 5 year pupil services license or Registering with ODE (as of April 7, 2021) is MANDATORY for school based practice
AMERICAN SPEECH AND HEARING ASSOCIATION (ASHA) www.asha.org	Must sign an affirmation statement every 3 years attesting to accumulation of 30 contact hours including ONE hour of Ethics beginning with the 2020 cycle to keep CCC's valid. Audits are randomly selected	Renew ASHA membership/certificati on annually. Contact hours are required every 3 years. Continuing education cycles vary.	30 contact hours to keep your CCC's current. Contact hours collected for OSHPB can also be used for ASHA CCC's maintenance.	Proof of contact hours such as Certificates of Attendance, University transcript or ASHA CE registry if audited.	\$225 annually to renew your CCC's and membership. Additional fees optional to join specific Divisions.	CCC's and membership in ASHA is OPTIONAL for school based practice. If you hold ASHA CCC's you MUST follow continuing education requirements to keep your CCC's current.

*Under the 1998 Certification Licensure Standards, physical therapists, school social workers, audiologists, speech-language pathologists, school nurses, and occupational therapists are required to maintain licensure through the other professional board in that area. In order to renew Department of Education licenses, these educators must maintain their other board license. By doing so, they meet all Department of Education renewal requirements and therefore do not need to work through the LPDC. These individuals will renew by submitting a renewal application with proof of current professional license to the Department of Education

Professional Organizations

Ohio's Early Learning & Development Standards

Social & Emotional Learning
Standards K-12

Delay vs. Disorder vs. Difference

A Speech sound delay is when speech is developing in a normal sequence pattern but occurring later than is typical.

A Speech disorder is when mistakes are not "typical" sound errors or are unusual sound errors or error patterns.

A Language delay is when language skills are acquired in a typical sequence, but lag behind peers their own age.

A Language disorder is when the ability to produce or understand connected words and meaningful sentences affects and adversely impacts social and educational performance including the ability to learn to read, write or spell.

A Language difference is when communication behaviors meet the norms of the primary community but do not meet the norms of Standard English. The difference can exist whether the person in question is a child from a different country or simply a different dialect.

In order to be eligible for special education services

According to The Individuals with Disabilities Education Act (<u>IDEA</u>) in order for a student to be identified as a student with a disability and receive special education (e.g., speech/language therapy) the student must:

- 1. Have an impairment, that
- 2. Results in an educational impact, that
- 3. Requires specially designed instruction (e.g., speech/language therapy) OAC 3301-51-01(B)(10)

Eligibility/Dismissal

What makes a student eligible? (Hint: not SD/standardized test)

Eligibility and Dismissal in the Schools

<u>Admission/Discharge Criteria in Speech/Language Pathology - Guidelines</u> <u>Decision Making in Termination of Services</u>

Eligible or Ineligible: Determining Adverse Effect

<u>Evaluation and Eligibility for Speech-Language Services in Schools</u> Ireland/Conrad

Eligibility/Dismissal cont.

<u>Special Education Eligibility: When Is a Speech-Language Impairment</u> <u>Also a Disability? | The ASHA Leader</u>

<u>Use of Design Thinking to Inform Eligibility Recommendations for Children With Spoken Language and Literacy Disorders in Schools | Perspectives of the ASHA Special Interest Groups</u>

Speech/Language Impairment (SLI)

The Individuals with Disabilities Education Act (IDEA) officially defines speech and language impairments as "a communication disorder such as stuttering, impaired articulation, a language impairment, or a voice impairment that adversely affects a child's educational performance." Each point within this definition represents a speech and language subcategory.

- A communication disorder such as stuttering provides an example of a fluency disorder; other fluency issues include unusual word repetition and hesitant speech.
- Impaired articulation indicates impairments in which a child experiences challenges in pronouncing specific sounds.
- A language impairment can entail difficulty comprehending words properly, expressing oneself and listening to others.
- A voice impairment involves difficulty voicing words; for instance, throat issues may cause an abnormally soft voice.

Related Services Defined

Federal definition:

Related services means transportation and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education, and includes speech-language pathology and audiology services, interpreting services, psychological services, physical and occupational therapy, recreation, including therapeutic recreation, early identification and assessment of disabilities in children, counseling services, including rehabilitation counseling, orientation and mobility services, and medical services for diagnostic or evaluation purposes. Related services also include school health services and school nurse services, social work services in schools, and parent counseling and training.

Service Delivery in the School Setting

Service delivery is a dynamic process whereby changes are made to:

- treatment setting (classroom, therapy room, job site and other school environments);
- format (individual, small group);
- intensity (the amount of time spent in each treatment session);
- frequency (the number of treatment sessions over a set period of time); and
- duration (the length of treatment received).

Cultural Considerations

• Practice Portal: Bilingual Service Delivery

Scheduling Considerations

- Cyclical Schedule
 - o The 3:1 Model—One of Many Workload Solutions to Improve Students' Success
- Traditional weekly schedule
- Block scheduling

Teaming & Collaboration

There are key people in districts and schools <a>SLPs should get to know-

Gen Ed Teachers: They know their students the best and should play a key role in the student's diagnosis, eligibility, treatment and carry-over of newly learned skills.

Intervention Specialists: Working closely with the IS will pay-off with increased student success.

Occupational Therapists & Physical Therapists: great sources for problem solving and teamwork, especially for students with multiple needs

Teaming & Collaboration

More key people in districts and schools **SLPs** should get to know-

<u>School Psychologists</u> - often are case managers with **eyes on due dates** and timelines and have some **background knowledge of students**

Special Services Supervisor - they have the **view of the whole district** and the big picture

<u>Educational Audiologist</u> – your ally and teammate when planning for students with hearing differences

Teaming & Collaboration

Other important team members

- Administrators
- Behavior Specialists
- Community Based SLPs or other therapists
- Guidance Counselor
- Nurses
- Orientation and Mobility Instructor

- Parents/Caregivers & Family Members
- Social Worker
- Teacher of the Deaf & Hearing Impaired
- Vision Impaired Specialist
- Vocational & Transition Coordinators

Screenings

OAC: 3313.673: Screening of beginning pupils for special learning needs

• Students enrolled for the first time as either a kindergarten or first grade student must have hearing, vision, speech and communication and general health screened by November 1st. How the screenings are completed depends on the individual district. Typically the SLP completes the speech and communication screening.

Screenings

Hearing Screenings:

- Preschool children attending a school based program will be screened each school year.
- School-age children in traditional classes shall be screened at six grade levels: kindergarten, first, third, fifth, ninth and eleventh. <u>Children's</u> <u>Hearing and Vision Program</u>

Preschool Screenings:

Preschool children attending a school based program will be screened annually using a comprehensive developmental screener in the following domains: language, cognitive, motor, social and emotional and behavioral.

Screenings

Initial or Reevaluation

All students being evaluated or reevaluated must have a vision and hearing screening per <u>ODE Operating Standards for the Education of Children with Disabilities</u> page 107.

ETR Tips:

Format with bold headings
Use parent friendly language
Type out acronyms the first time

• Include:

- background information
- reason for the referral
- parent input related to history, strengths, and concerns
- o teacher input related to communication
- o academic information
- data from intervention or current therapy
- standardized test results explained with examples
- o authentic assessments (ex. checklists, curriculum-based assessments)
- o comments on all Speech-Language areas (ex. voice, fluency informally assessed)
- observation summary (must be included for initial evaluation)

ETR Tips:

Preschool

- Summary of interventions provided is required for preschool children only if the preschool child previously received services unter Part C and/or Part B of IDEA or is being evaluated under the suspected disability category of specific learning disability.
- Multiple sources of information are required to determine eligibility. For preschool, these sources include information from Part C when children transition from early intervention, structured observations in more than one setting and in multiple activities, information provided by the parent or caregiver and criteria and norm-referenced evaluations. All developmental areas, not just those related to the disability, must be assessed with at least one source of information. (See Preschool Planning Form.)

IEP Tips:

Present Levels of Performance (PLOP) must include:

- Summary of Skills: present level of performance, what the student can do (strengths)
 related to goal area as well as needs
- Baseline Data: for the NEW goal and objectives *ensure baseline unit of measurement is the same as the annual goal and directly related to needs.
- Comparison to Peers: a statement connected to how the student is performing related to the grade level Ohio Learning Standards or Early Learning and Development Standards.
 - Avoid terms such as "typical peers..."
 - Review PLOP checklist in <u>"LiveBinder"</u> resources for Preschool requirements
- Consider formatting the above in bold headings or italicized (as shown)

IEP Tips:

Goals/Objectives:

- Must be separate skills (goal cannot be a blending of skills targeted in the objectives...target a primary skill...make it clear and manageable...simplify)
- Must include what the student will do, the condition, criteria, and mastery level
 - IEP Goal Writing PD.docx

IEP Tips:

Preschool:

- Young children transitioning from Early Intervention (Part C) deemed eligible for special education must have IEPS in place and implemented (services being provided) on or before their 3rd birthday. See Indicator 12 webinar.
- When the IEP identifies supports for school personnel to enable the child to be involved and make progress in the general education curriculum, one must provide the amount of time and frequency in the description for each service.
- For students moving from preschool special education to kindergarten, information including the Early Learning Assessment and the Child Outcomes Summary Form, parent information, previous setting and severity of disability and adequate supports should be found in the justification for why the child was removed from the general education classroom.

ETR/IEP Resources

- Ohio Department of Education (ODE) videos and resources for completing ETRs/IEPs:
 - o <u>Universal Support Materials | Ohio Department of Education</u>
 - <u>Preschool Universal Support Materials | Ohio Department of Education</u>
- Office for Exceptional Children "LiveBinder" of resources for ETR, IEP, and Post-Secondary Transition
 - Resources for Essential IEP, Essential ETR, Post-Secondary Trans
 - Includes guides and checklists for referral planning, ETR, PLOP, Goals, SDI, and more!

Determining Frequency & Duration

Not all students need the same amount and frequency of services. The IEP team determines the amount and frequency of *individualized* services. Not all students should receive weekly or bi-weekly therapy services.

Take into consideration-

- Severity
- Need
- Prognosis
- Age
- Years in therapy already

Scheduling

Your schedule is likely to change often

Be sure to schedule based on individual needs

Consider travel time and lunch

Creative ideas to schedule

- · Scheduling donut/ice cream or pizza party in the teacher's lounge
- Osking teachers to provide a few available times to choose from
- · Use Loogle Docs

SAMPLE Severity Rating Scale

AREA	NORMAL	MILD	MODERATE	SEVERE
Language	Less than 1 standard deviation below the mean standard score 16th percentile or above Language skills are with expected language performance range on informal assessments Acquisition of basic academic, social,and or vocational skills is not affected.	1 to <1.5 standard deviations below the mean standard score 7-15th percentile Informal assessment indicates a language deficit Minimal interference with communication. Acquisition of basic academic, social,and/or vocational skills may be affected.	1.5 to 2 standard deviations below the mean standard score 2nd -6th percentile Informal assessment indicates a language deficit that usually interferes with communication. Area

Early Childhood Considerations

<u>Developmentally Appropriate Practices</u>: "Methods that promote each child's optimal development and learning through a strengths-based, play-based approach to joyful, engaged learning." National Association for the Education of Young Children (NAEYC)

<u>Early Learning & School Readiness (ELSR):</u> Early Childhood is considered Age 3 to Grade 3. This Ohio Department of Education (ODE) website is devoted to many of topics in early childhood (PK-K) that ODE has jurisdiction over. ELSR is a section with in the ODE.

<u>Early Learning Assessment and Child Outcome Summary Process</u>: All preschool students with disabilities need to have the required ELA components administered along with the Childhood Outcome Summary (COS) process completed. If the SLP is responsible for scoring, they will need to the training from on the ELA (ELSR) and COS (SST).

Early Childhood Considerations

Ohio Department of Education (ODE) Licensing for Preschool Students/Step Up to Quality: Preschoolers always must be in the care of adults who have specific documents/credentials on file with the program. If a child is removed from the classroom, the adult is "used in ratio" and needs a file. This includes the requirement of licensing orientation training. There may be need for enhanced background check. Licensing rules are currently under revision (2/2021)

Ohio Child Care Resource & Referral Association (OCCRRA): Professional Development and licensing orientation training is required for all adults "used in ratio." Requires and OCCRRA account.

<u>Bold Beginning:</u> Ohio's early childhood programs and services for children, families, and communities

School District and Building Specifics

- Workspace
- Safety Training
- Specific SkillTraining
- MTSS/RTI
 - o PBIS
- District Information

Workspace

Per the **Operating Standards**: Service providers

- Must have access to an office or room space suitable for private consultation or intervention;
- Access to a telephone in an area where scheduling, parent contacts and confidential conversations regarding children can be completed;
- And adequate office equipment including a locking file cabinet with a key and supplies.
- Service areas must be equipped with the appropriate materials, equipment, and facilities necessary to identify children with disabilities and to implement the child's IEP and meet the educational, physical, developmental, and learning needs of children within the area.

Annual School Safety Training

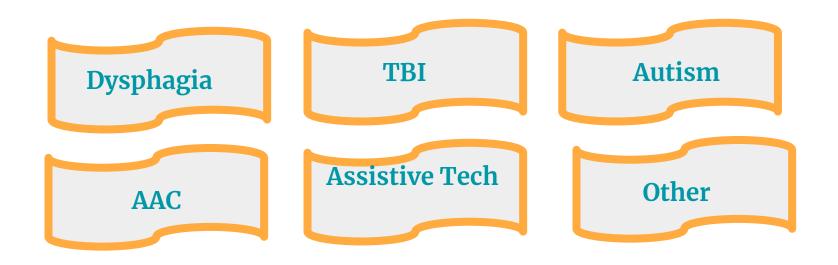

Public School Works:

- District assigns & tracks specific modules
- Online modules
- Usually due by mid-year
- Renewable annually or less often depending on the module

Training in specific skills may be needed in areas such as:

Informative modules can be found at **OMNIE** and the **ASHA portal** for support.

MTSS/RTI

Multi-Tiered System of Supports (MTSS) is a school model that uses data-driven problem-solving and incorporates system-level change to address both the academic and non-academic needs of all students. MTSS has a broad scope, including school culture, family engagement, social/emotional wellness, attendance, and so on, in addition to academics.

Response to Intervention (RTI) is used to help identify and support individual struggling students; it is designed for use in both general education and special education, creating a well-integrated system of instruction and intervention guided by child outcome data. There are four main components of RTI:

- Multi-tiered prevention system
- Universal screening and ongoing progress monitoring
- Data-driven decision-making to guide the selection of evidence-based interventions

SLPs support the whole child, while focusing on communication needs in the educational context. The Network developed a <u>model RTI framework</u> for SLPs that districts may borrow and customize. The framework is specific to speech-language, with an eye on additional needs a student may present.

Workload & Caseload

- Definitions
- Rule 3301-51-09
- Workload/Caseload
 Calculator Options
- Service Provider
 Workload Rule video
 series

Definition of Workload & Caseload

ASHA Definitions:

Workload refers to all activities required and performed by school-based SLPs. Workload includes the time spent providing face-to-face direct services to students as well as the time spent performing other activities necessary to support students' education programs, implement best practices for school speech-language services, and ensure compliance with the Individuals with Disabilities Education Improvement Act of 2004 (IDEA, 2004) and other mandates.

Caseload refers to the number of students with Individualized Education Programs (IEPs), Individualized Family Service Plans (IFSPs), and 504 plans served by school-based speech-language pathologists (SLPs) and other professionals through direct and/or indirect service delivery options. In some school districts, caseloads may also include students who receive intervention and other services within general education designed to help prevent future difficulties with speech, language learning, and literacy. Caseloads can also be quantified in terms of the number of intervention sessions in a given time frame.

Workload Rule -- Prong 1

"Workload" means all services and duties assigned to service providers. This consists of direct and indirect (including but not limited to meetings, paperwork, professional development) service to children with and without disabilities.

Districts must use a workload process to determine the service provider's caseload. Once the district determines the workload, it must decide if the workload can be completed as it is assigned. If a provider cannot perform all workload duties and meet the direct service/specially designed instruction needs for your assigned children, then you must reduce the caseload or workload. This is regardless of the maximum numbers outlined in the Ohio Operating Standards for the Education of Children with Disabilities. (OAC 3301–51–09(I)).

Workload Rule -- Prong 2

Maximum Caseload Ratios Exist - Rule 3301-51-09

1:80 school aged children with disabilities (OR)

1:50 school age children with multiple disabilities, hearing impairments, autism, orthopedic impairment or other health impairment. (OR)

1:50 preschool children with disabilities (OR)

A combination of preschool and school-age children with disabilities or children with multiple disabilities, hearing impairment, autism, or orthopedic/other health impairments proportionate to these ratios.

Workload Rule -- Prong 2

For mixed caseloads, the sum of the proportional calculations (weights) shall not exceed 80.

Assign a weight of 1.6 to the following:

- Preschool student (or)
- Students identified as having multiple disabilities, hearing impairment, autism, orthopedic impairment and/or other health impairment.

Assign a weight of 1 to all remaining students.

Workload/Caseload Calculator Options

Per ODE, the district *must* consider the individual needs of each child and the level and frequency of services required.

A variety of workload/caseload calculators have been created that apply weighted values based on typical needs for students in a disability category and age/grade range.

- ASHA
- Conrad/Slone Calculator and Guidance Document
- ❖ ODE Service Provider Ratio and Workload Calculator

Use these calculators as a form of data to self advocate!

Workload/Caseload

What happens if an SLP exceeds the maximum caseload ratio?

• If the workload determination is not reasonable and/or the caseload ratio exceeds the maximum caseload ratio, the school must (a) adjust the workload expectations (and/or) (b) change the proposed caseload ratio. If the caseload or workload cannot be adjusted, the district or school must obtain a waiver form the Ohio Department of Education.

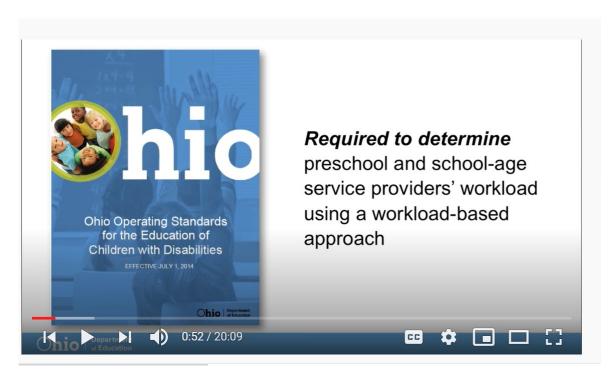

How many SLPs should be hired in a district?

• Each district needs to provide speech language pathology services at a ratio of at least one SLP per 2000 students.

Telepractice

- Introduction
- Synchronous vs asynchronous
- Hybrid
- TelepracticeResources

Telepractice Introduction

- ASHA approves the use of a telepractice service delivery model to provide speech-language and audiological services.
- <u>Telepractice services</u> must be equivalent in quality to in-person services and requires adherence to the ASHA Code of Ethics, and Scopes of practice for Audiology and Speech-Language Pathology and applicable state and federal laws.
- There is a growing body of research related to the evidence base for telepractice. Review current findings in <u>ASHA's Telepractice Evidence</u> <u>Map</u>

Telepractice Introduction

- The <u>ASHA Telepractice Portal</u> can help you understand the responsibilities, regulations and ethical considerations
- Telepractice services can be delivered in a variety of formats. For example,
 - Telepractice can be the exclusive service delivery model and delivered synchronously or asynchronously
 - Telepractice can be combined with in-person delivery for a "hybrid" delivery model

Synchronous Service Delivery

- 1. Assessment and Intervention Services are provided using a video conferencing platform such as WebEx, Zoom, Google Hangouts, etc.
- 2. The services are delivered with students in an interactive, real-time condition which is similar to the experience provided during traditional in-person service delivery
- 3. The services can also include coaching caregivers to provide services.

Asynchronous Service Delivery

- Asynchronous can refer to store and forward or the delivery of indirect service such as
 - a. Phone calls with parents/ students to discuss therapy
 - b. Emails with parents/students to discuss therapy
 - c. Transmission of therapy materials/activities to parents and students via platforms such as email, google classroom, text, classroom dojo, see saw, etc.

Hybrid Telepractice

- ASHA defines Hybrid Telepractice as applications of telepractice that include combinations of synchronous (e.g. real-time therapy sessions), asynchronous (e.g. recorded therapy sessions recorded for later review), and/or in-person services.
- *In Ohio*, telepractice/telehealth-based services are under the same guidelines and regulations as in-person services. Please follow this <u>link</u> to read Ohio's Telepractice Requirements for Audiologists and Speech-Language Pathologists.

Tips and **More Tips**

Medicaid

- Expectations
- Requirements
- Data Reporting

Medicaid Documentation Expectations

- Each district utilizes a different Billing Agency (i.e. HBS, HPS, Alliance, etc.)
- Billing agencies will provide training for documentation and expectations.
 - Note: Many billing agencies require SLPs to document for ALL students regardless of eligibility for Medicaid.
- What is a 'billable activity'
 - o Any direct service to a student (individual or small group) designed by IEP.

Questions? Review Ohio Medicaid School Program website

Medicaid Documentation Requirements

All services submitted for reimbursement under the Medicaid School Program must be ordered, prescribed or referred by a physician or *licensed practitioner* of the healing arts.

Note: CFs are not permitted to complete the referral. The CF supervisor or CF mentor will need to complete the referral instead. Then the CF can document services and submit for billing.

The SLP prescribing or referring the service must have both of the following:

- 1. <u>Medicaid billing provider number</u> ("legacy number")
- 2. National Provider Identification (NPI) number

Medicaid Schools Data Reporting

Data collection must include the following:

- Date of service
- Start/End time or length of time (depends on billing agency)
- Group Size
- Code for Reimbursement
- Targeted Area
- Data collected
- Progress

ODE

Our district is under state review and I need to ensure I'm following ETR & IEP guidelines. Where would I find reliable resources?

ASHA

I have a tricky case that I haven't had experience with before. Who might I call for guidance?

I need to meet. required CE hours. Who can I contact to find out what types of activities I can count as an SLP?

OSHPB

I've been told to make a student eligible for services, but he doesn't meet the three prongs of eligibility outlined in Federal law. Who do I call to find out what I should do next?

ODE or OSHPB

Union

I've been asked to back date billing information, who do I contact to discuss my ethical dilemma?

I've been assigned to duties in all 3 of my buildings and I don't think it's fair. Who can I call?

OSSPEAC or OSLHA

I don't have SLP specific PD in my district and I want to grow and learn in my field. Who do I contact for info on newsletters, job-related social media posts, available PD, and large, amazing gatherings with SLPs?

Friend

I'm in a new placement and everyone ignored my suggestions in a meeting. I need someone to make the best cookies for me to take to my next meeting. Who can help me?

SLP/AUD SUPERVISORY NETWORK

I've had a stressful week at work and I need a glass wine/whine. Who should I call?

Assistive Technology

- Assessment Resources

AT Lending Libraries

The OCALI Lending Library is available to any person over the age of 18 residing or working in the state of Ohio. A variety of assistive technology tools may be borrowed, including AAC devices and tablets with communication apps.

OSU's AT Ohio has a large library of assistive technology devices for you to try out, free of charge. You may try the device for 30 days from the day you receive it. A signed agreement form is required.

AT/AAC Training

ATIM is designed to provide high-quality information and professional development on assistive technology (AT) for educators, professionals, families, persons with disabilities, and others. Each module guides you through case studies, instructional videos, pre- and post-assessments, a glossary, and much more. ATIM modules are available at no cost.
