

Why Cochlear Implant Wear Time Matters

Child A Listens...	Child B Listens...	Child C Listens...
100% of Waking Hours	60% of Waking Hours	20% of Waking Hours
		
Normal spoken language at age 3	Delayed spoken language at age 3	Severely delayed spoken language at age 3
More speech in= More speech out		
Children implanted over 12 months need to listen more than 80% of their day for normal spoken language scores.
