HeatMe Pro operates on **PTC ceramic heating technology**, a safe and energy-efficient method widely used in modern heating devices. Here's why it stands out:

- **Rapid Heating:** PTC ceramic elements heat up within seconds, delivering warm air almost instantly.
- **Auto-Regulation:** As the temperature rises, the ceramic element naturally reduces energy consumption, preventing overheating and reducing electricity waste.
- **Even Heat Circulation:** A built-in fan helps distribute heat evenly throughout the room, eliminating cold spots and ensuring consistent comfort.
